Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 7 is objected to because of the following informality:

In line 4, changer "stronger clamping force" to read, "greater clamping force".

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 4 and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. Claim 4 recites the limitation "the smaller end" in 4. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-3, 6 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Scafaro '050.

7. Scafaro discloses an expander locking plier comprising: a fixed arm wherein a J-shaped clamping arm with adjustable jaw is attached to one end and a rear adjustment screw is attached to the other end, a movable arm wherein a self-locking and quick release mechanism is equipped, an adjustable moving jaw connecting one end of the fixed arm and one end of the movable arm by pivots, and a crossed relationship between the J-shape clamping arm and the adjustable moving jaw is created; the cross-section of the fixed arm is U-shape at the J-clamping arm end and cylindrical shape at the rear adjustment screw end; the movable arm is of similar design to a conventional locking plier, and is equipped with self-locking and quick release mechanism which is used to lock the expander locking plier in locking position with desired force and release the clamping action quickly and easily; the cylindrical shaped end is threaded internally to accept the rear adjustment screw for the adjustment of the clamping size and clamping force by turning the rear adjustment screw clockwise or counterclockwise; and the free end is equipped with a long screw inserted into a threaded hole so that the length of the protrusion of the screw can be adjusted, the long screw is made to have clamping jaw surface (Fig. 1).

Allowable Subject Matter

8. Claims 4, 5, 7 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
